WOODEN PALLET  
COMPONENTS MANUFACTURER  
LEADER IN EUROPE

# Our history

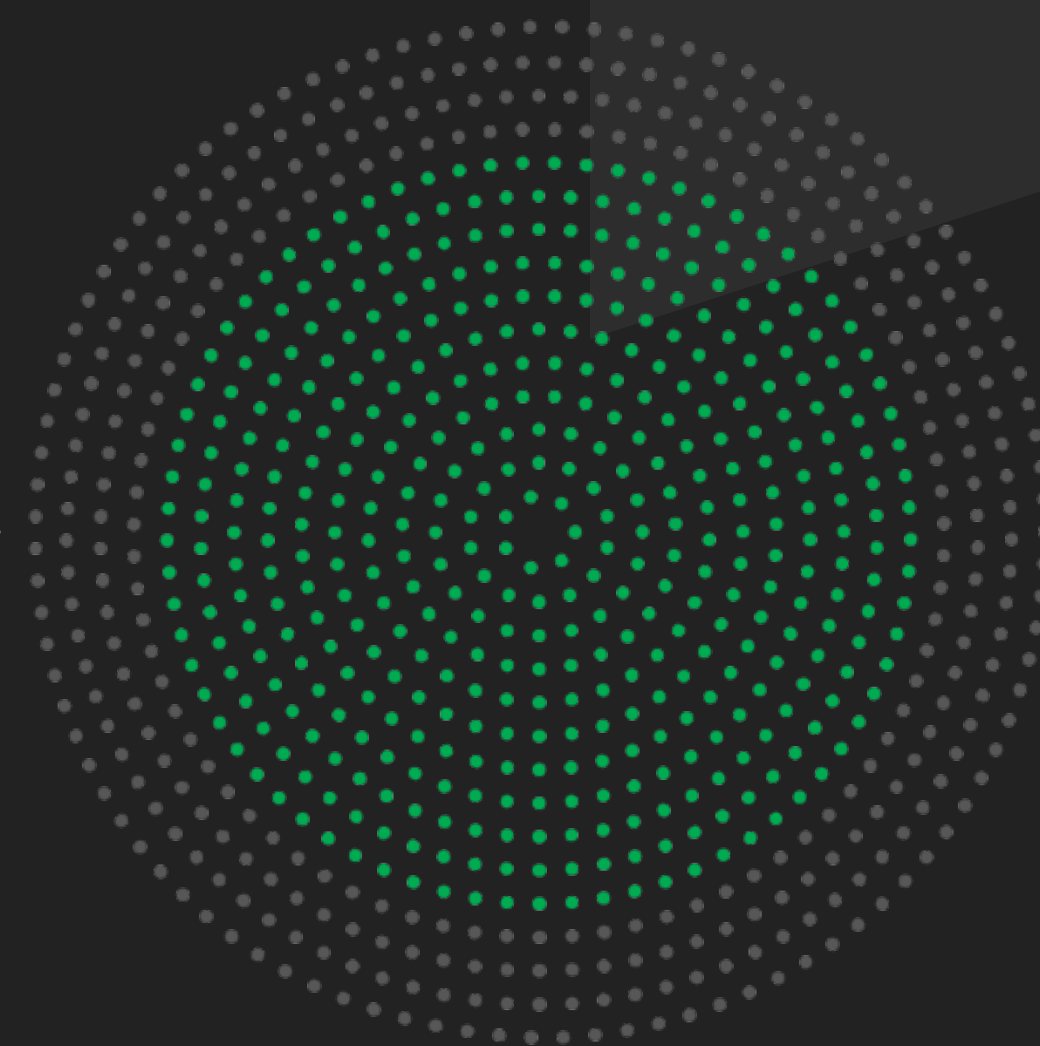

In 1994, JUODELIAI started as a small family business, and today, it continues its activities as a company belonging to the TMV CAPITAL group and is one of the leaders in the production of wooden pallet blanks in Europe.

# JUODELIAI specializes in high-volume production

A clear strategy, a rational vision, and many years of experience allow the company to work efficiently. And this - together with modern business optimization and wood processing technologies - ensures consistent growth.

# Production

## Pallet components

JUODELIAI produces high-quality wooden pallet blanks, made from both softwood and hardwood. The company offers natural humidity, anti-stain treatment and drying services based on client preferences.

## Species

### Softwood

(mixed Pine and Spruce)

### Hardwood

(mixed Birch, Alder and Aspen)

JUODELIAI is a flexible business, so considering customers' specific wishes, the company can produce non-standard wooden elements for various purposes, which can be used in gardening, construction, and the furniture industry.

# Measurements

In accordance with specific requirements, JUODELIAI can produce wooden blanks in a wide range of dimensions.

---

**Thickness:** from 12 mm  
up to 200 mm

---

**Width:** from 60 mm  
up to 200 mm

---

**Length:** from 800 mm  
up to 3100 mm

---

# Lumber grading rules

We offer three quality levels of wood production:

## Grade 1

Material under this grading is sharp-edged, no blue stains, no worm holes, no falling knots.

## Grade 2

Material under this grading contains waness (up to 66% of thickness and width); no bark allowed; material can come with blue stains or worm holes.

## Grade 3

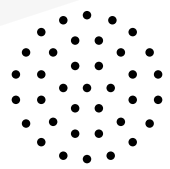

Material under this grading contains deep waness (but the board should maintain its thickness and width throughout), and can come with bark, blue stains, and worm holes.

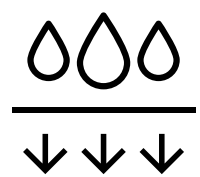

# Treatments

JUODELIAI sells boards and pallet components that are freshly cut and have natural humidity. At the customer's request, the company performs a drying service and supplies dried boards:

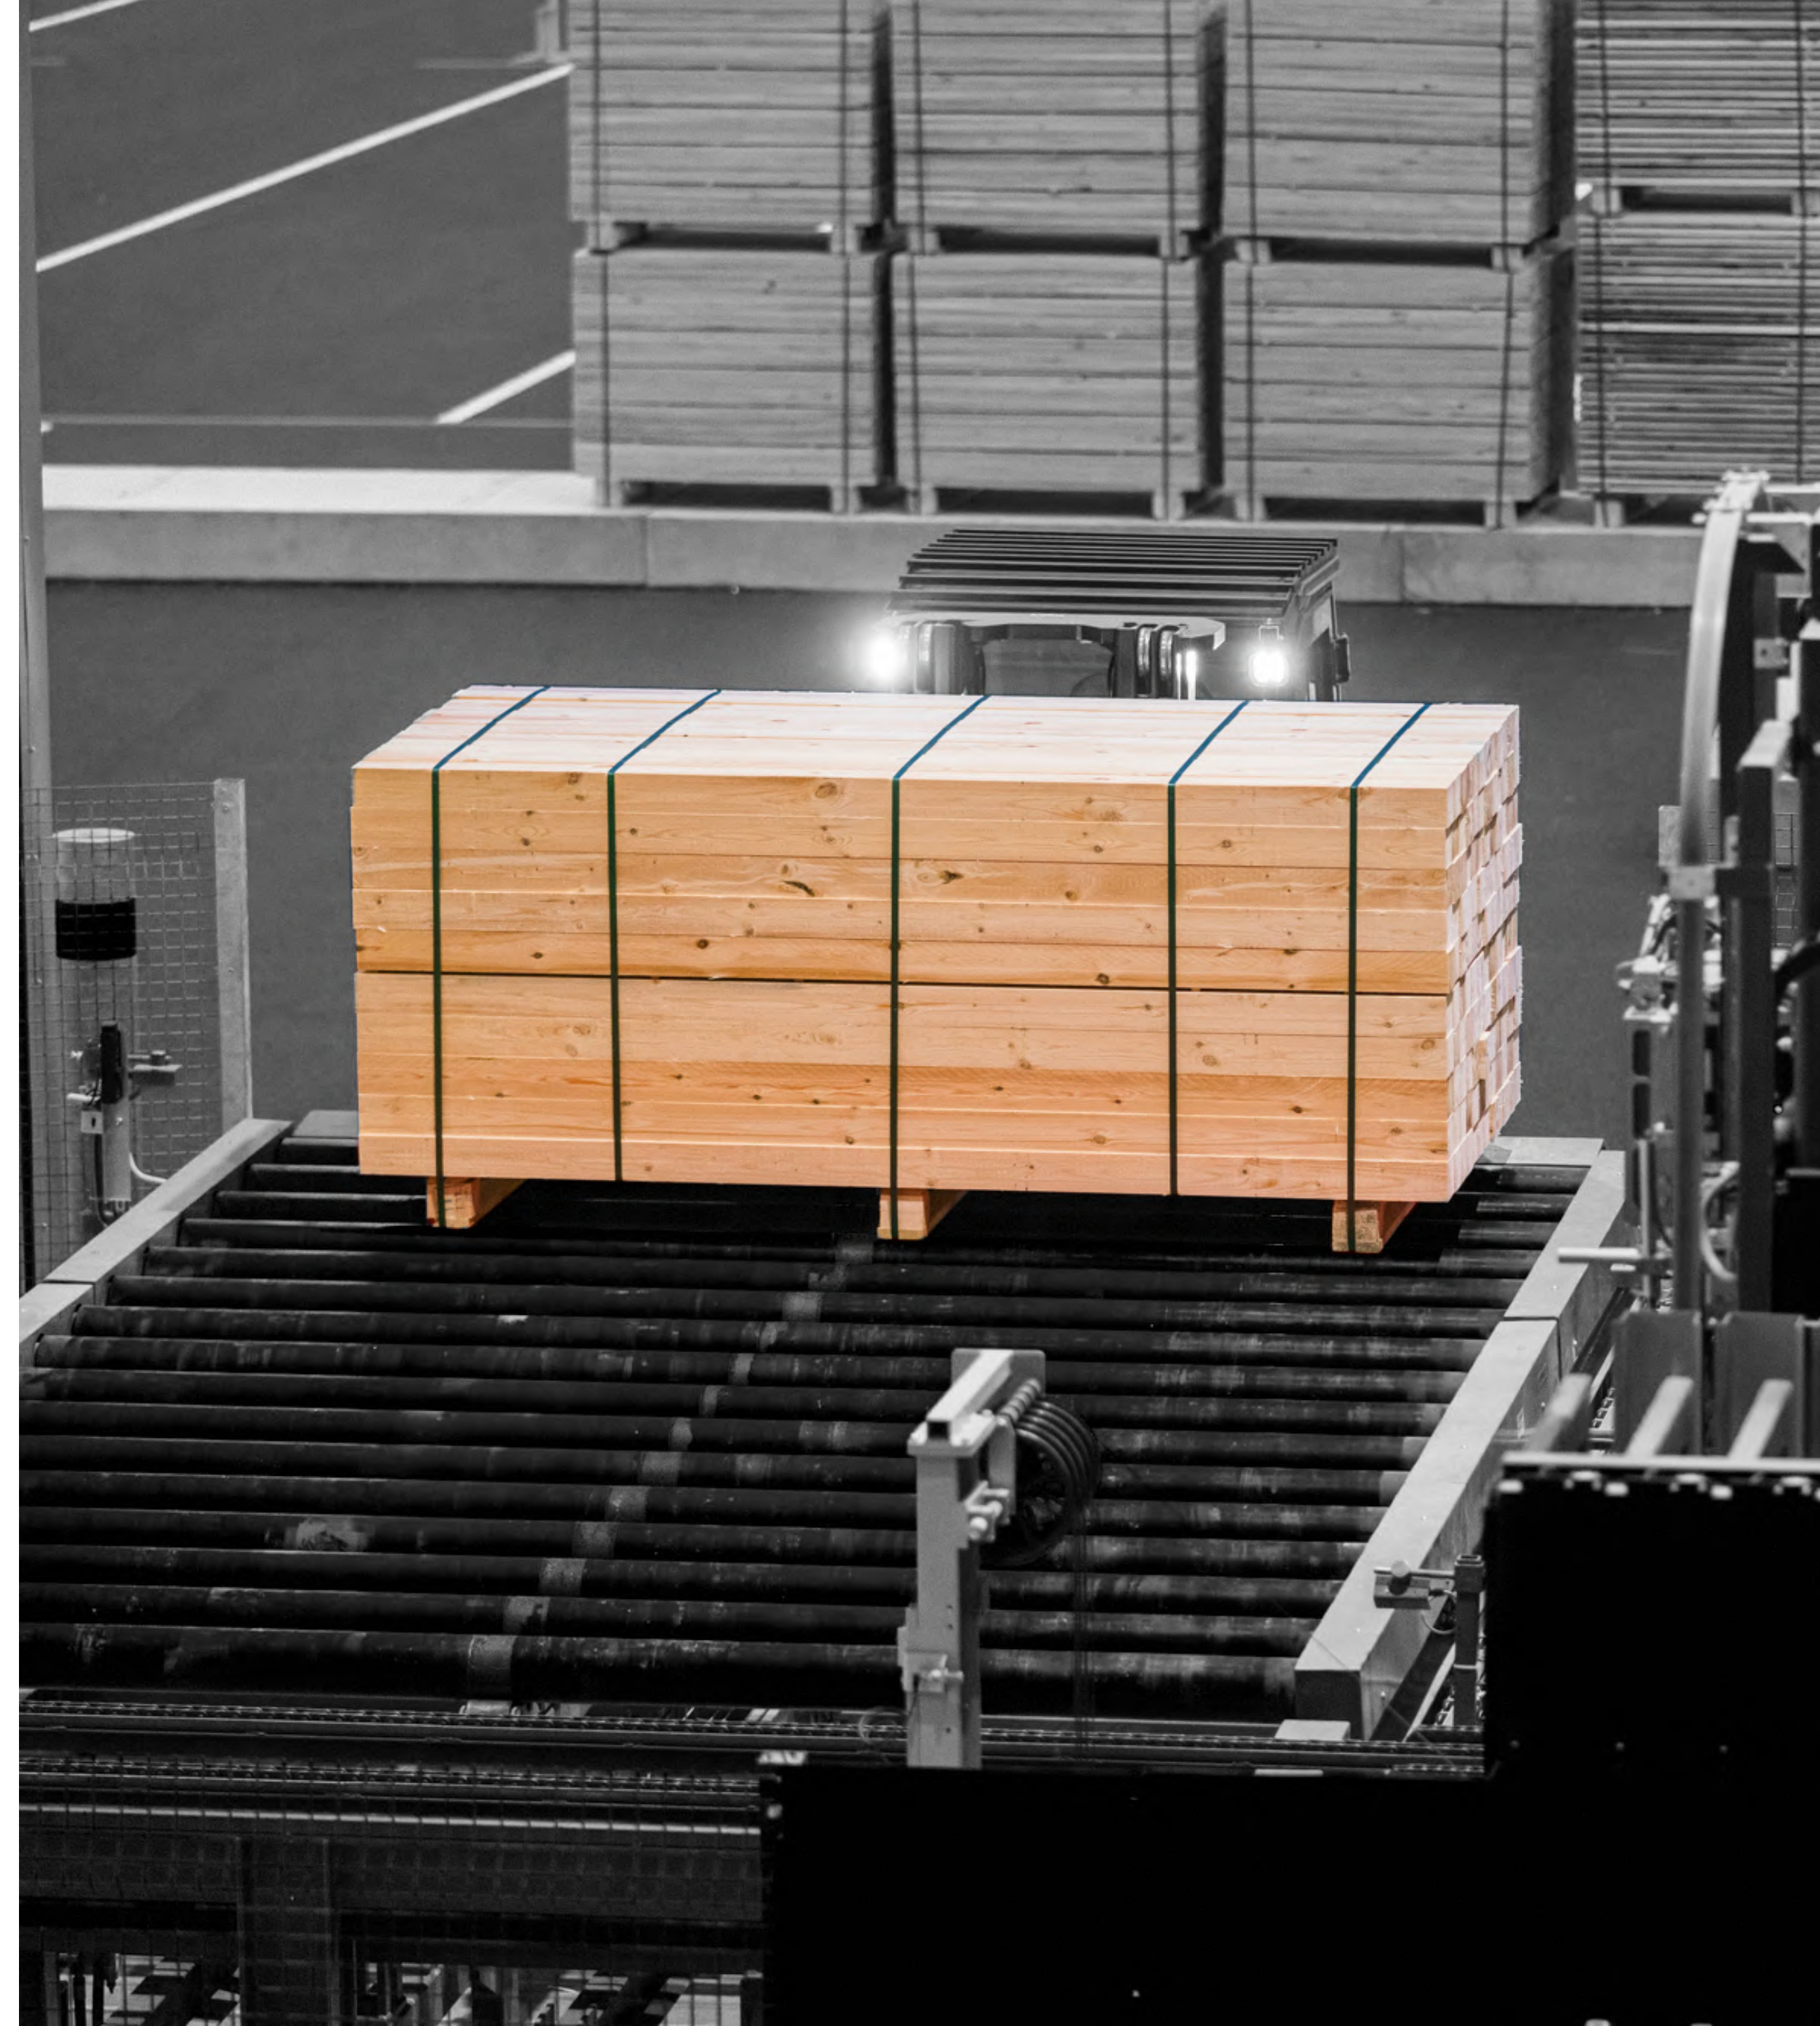

## Kiln-Drying <sup>(KD)</sup>

The moisture content can be changed to match the client's requirements from 8% to 20%.

## Anti-Stain Treatment <sup>(AST)</sup>

To keep wood clean and avoid mold during transportation, we offer AST. This is a year-round service, using successful technology with over ten years of experience.

# JUODELIAI is a zero waste company

The company adheres to the principles of the circular economy. Optimized production processes make it possible to achieve 100% utilization of raw materials and avoid production waste. The by-products obtained during the production process are suitable for biofuel and furniture industry use.

Wood chips

~27 000 m<sup>3</sup>/month

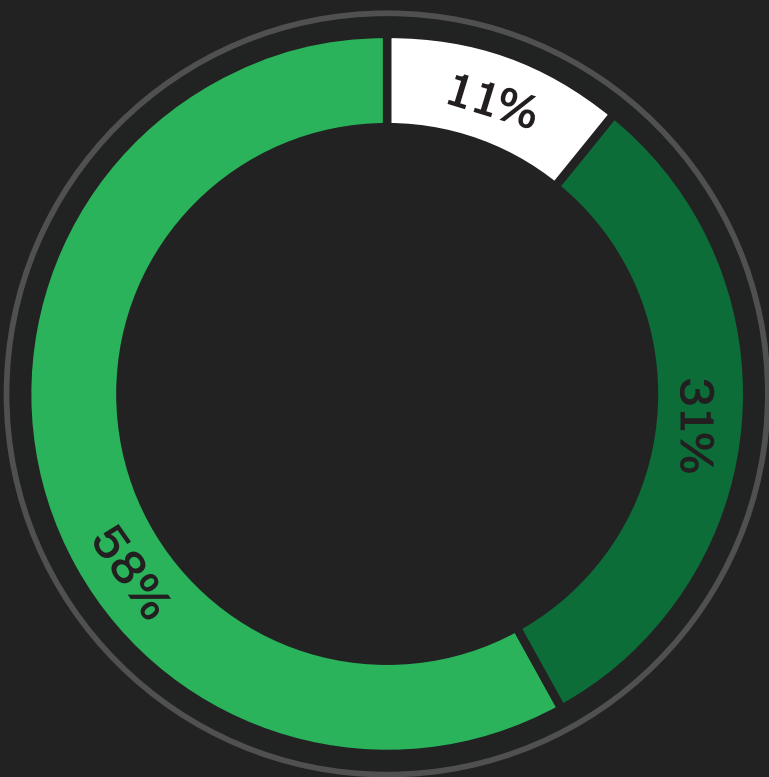

# Sales

89% of the production is exported to foreign markets

Continuous growth and many years of experience led to JUODELIAI not only crossing the borders of Lithuania but also becoming one of the largest manufacturers of wooden pallet blanks in Europe. The company's products also reach partners in Asia, North America, and Africa.

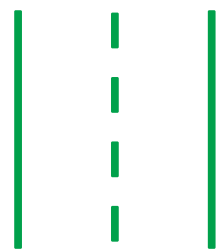

- Lithuania
- Europe
- Asia, USA and North Africa

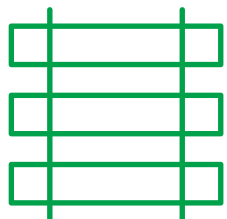

# Logistics

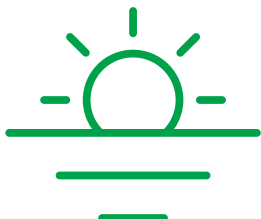

JUODELIAI has access to an ice-free port, which means that properly-processed wood can be delivered around the world all year round.

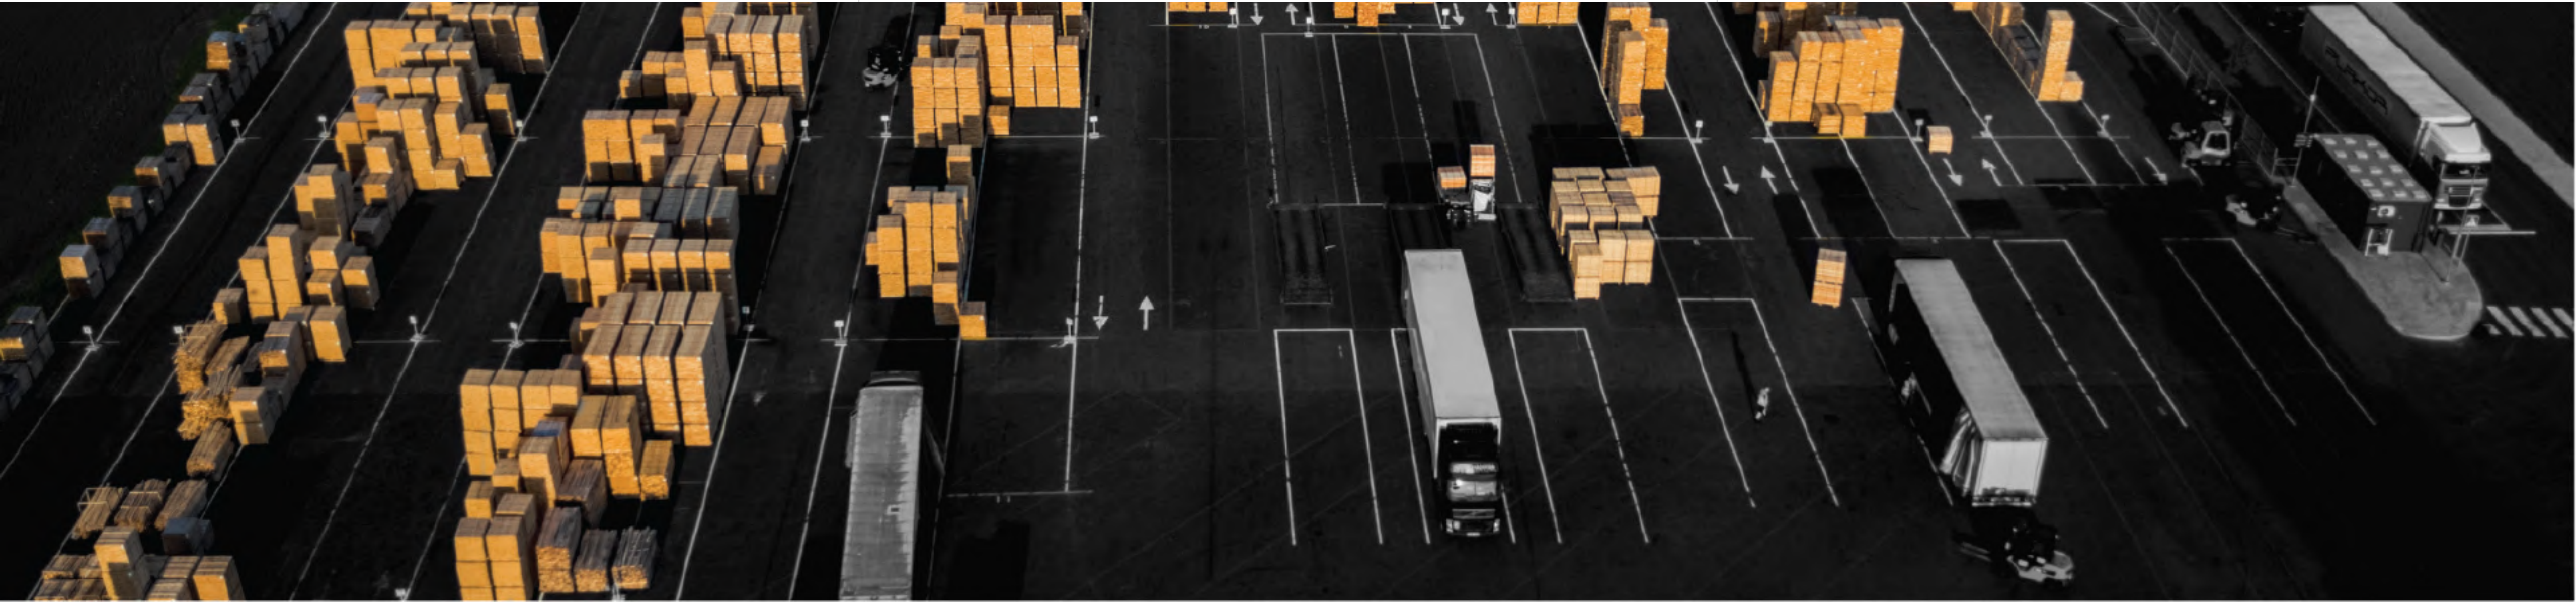

Lorries

Railway

Sea containers

# Certificates

By building up the business and always thriving to achieve the highest levels of quality, JUODELIAI has had the honour to receive the following certificates.
